COMMERCIAL PROPOSAL

Institutional Website Design & Development

A modern, reliable and admission-focused digital platform for U40 Academy Inn.

PREPARED FOR

U40 Academy Inn

PREPARED BY

VardexLabs

PROPOSAL VALUE

₹24,500

PROPOSAL DATE

02 August 2026

VALIDITY

15 calendar days

REFERENCE

VDX/U40/2026/08-01

A credible digital campus for students and guardians.

VardexLabs proposes to design, develop and deploy a responsive institutional website for U40 Academy Inn. The website will communicate academic programs, residential facilities, student outcomes and admissions information through a clear, modern experience designed for mobile-first visitors.

₹24,500

Fixed project fee

A defined commercial scope with milestone-based payments and no hidden development charges.

4–5 weeks

Estimated delivery

Subject to timely content, feedback and approvals from the client.

Responsive
Designed for every screen

Optimised for mobile phones, tablets, laptops and large desktop displays.

Full-stack
Admissions-ready

Online inquiry submission, secure cloud database and reference-based application tracking.

The objective is not only to publish information, but to establish institutional trust and create a practical admissions channel for prospective families.

Primary project objectives

- Present U40 Academy Inn as a credible residential science institution.
- Make academic programs, hostel facilities and results easy to understand.
- Provide one clear path from discovery to an admission inquiry.
- Offer a reliable inquiry tracking experience for guardians.
- Create a maintainable platform ready for future expansion.

Complete website experience, from strategy to launch.

The engagement covers the design and engineering required to deliver a production-ready institutional website—not a generic template or a static brochure page.

01	Discovery & structure	Business requirement review, target-audience mapping, navigation planning, page hierarchy and admissions journey definition.
02	Visual identity	Institutional colour system, typography, UI components, web-ready logo treatment and a consistent visual language.
03	UX/UI design	High-quality responsive layouts with clear hierarchy, accessible contrast, touch-friendly controls and focused calls to action.
04	Frontend development	Responsive React implementation covering header, hero, programs, campus life, results, admissions, location and footer.
05	Admissions system	Validated admission inquiry form, unique reference generation, secure database storage and application-status lookup.
06	Cloud deployment	Production build, Cloudflare Worker deployment, D1 database setup, asset delivery and baseline security configuration.
07	QA & handover	Responsive testing, browser checks, form workflow testing, production verification, documentation and one handover session.

What U40 Academy Inn will receive.

Website sections

- Responsive institutional header and navigation
- Admission-focused hero presentation
- About and educational model
- Academic programs and pathways
- Residential life and facilities
- Results and student outcomes
- Admissions process and inquiry form
- Application-status tracking
- Contact, location and campus visit CTA
- Institutional footer and legal placeholders

Technical deliverables

- Mobile-first responsive frontend
- Form validation and user feedback states
- Cloud-based admissions database
- Unique inquiry reference codes
- Secure phone-based tracking verification
- SEO title and description metadata
- Branded favicon and social metadata
- Accessible keyboard focus and labels
- Optimised production build
- Cloudflare production deployment

Proposed technology

React

TypeScript

Tailwind CSS

Cloudflare

Workers

D1 Database

tRPC API

Responsive UI

All project source files and production configuration will be handed over after receipt of the final payment.

Design revision allowance

Two consolidated revision rounds are included during the design and content-review stage. Corrections within the agreed scope are included.

Post-launch warranty

Thirty calendar days of bug-fix support are included for defects relating to the agreed and delivered functionality.

A focused four-to-five-week delivery process.

The schedule begins after receipt of the advance payment and all essential content required for the first design cycle.

Week 01	Discovery	Requirements confirmation, content inventory, sitemap, admissions flow and project setup.
Week 01–02	Design system	Visual direction, typography, colours, logo treatment, hero direction and key responsive layouts.
Week 02–03	Development	Responsive frontend construction, content integration, interactions and component implementation.
Week 03–04	Admissions	Inquiry form, database integration, unique references, tracking workflow and error handling.
Week 04	Review & QA	Client review, approved corrections, device testing, browser testing and production readiness.
Week 04–05	Launch	Cloud deployment, domain connection support, final verification, documentation and handover.

Client inputs required

Final institutional text, verified result figures, program details, phone numbers, address, approved photographs, legal policy text and domain/DNS access where applicable.

VardexLabs responsibilities

- Project planning and implementation
- Design and responsive development
- Database and cloud configuration
- Testing, launch and handover

Client responsibilities

- Provide accurate, authorised content
- Nominate one approval contact
- Return consolidated feedback promptly
- Provide domain and account access

Fixed project investment: ₹24,500

The following pricing reflects the complete agreed scope from discovery through production deployment.

WORK PACKAGE	INVESTMENT
Discovery & information architecture Requirements, sitemap, content structure and admissions journey	₹2,500
UI/UX design & brand integration Design system, responsive layouts, web logo adaptation and visual assets	₹4,500
Responsive frontend development React implementation across all agreed institutional sections	₹7,000
Admissions form, API & tracking system Validation, database, references, status lookup and feedback states	₹5,000
Cloud deployment, QA & security baseline Cloudflare Worker, D1 setup, testing and production verification	₹3,500
Handover, documentation & warranty Handover session, project notes and 30-day bug-fix period	₹2,000
Total project fee	₹24,500

Payment milestones

40% ₹9,800 Advance payment to confirm the project and begin discovery.	40% ₹9,800 After design approval and delivery of the functional staging build.	20% ₹4,900 Before production launch, source handover and final access transfer.
--	--	---

Tax note: GST or other statutory taxes, if legally applicable to the invoice, will be charged separately. Third-party paid services are not included in the project fee.

Clear responsibilities for a smooth delivery.

Proposal validity

This commercial proposal remains valid for 15 calendar days from 02 August 2026. Scope and pricing may be reviewed after expiry.

Feedback & approvals

The client will provide consolidated feedback through one nominated representative. Delayed feedback may move delivery dates.

Intellectual property

Upon full payment, the client receives ownership of the custom project source and final design deliverables, excluding third-party tools and licences.

Hosting & domain

Deployment configuration is included. Domain registration, renewal and any paid Cloudflare or third-party usage charges remain the client's responsibility.

Project commencement

Work begins after written approval, receipt of the 40% advance and availability of the essential client content.

Change requests

Requirements outside the approved scope will be estimated separately and started only after written approval of cost and schedule.

Warranty support

The 30-day warranty covers reproducible defects in delivered scope. New features, new content and third-party changes are excluded.

Content responsibility

The client is responsible for the accuracy, ownership and legal permission of all institutional claims, results, names, photos and policy content.

Not included unless separately agreed

- Custom admin dashboard or staff login portal
- Online fee payment gateway or accounting integration
- Student learning management system, attendance or examination portal
- Professional photography, video production or extensive copywriting
- Bulk historical data entry, migration or document digitisation
- Ongoing SEO campaigns, advertising, social media or maintenance retainers

Approval to proceed.

By signing below, both parties acknowledge the project scope, commercial value, payment milestones, assumptions and terms described in this proposal.

Project confirmation

U40 Academy Inn authorises VardexLabs to commence the Institutional Website Design & Development project at a fixed professional fee of ₹24,500, subject to the terms of this proposal.
